ACT BIO-CHOLINE ORGANIC

BENEFITS OF CHOLINE FROM ACT BIO-CHOLINE ORGANIC

- ACT BIO-CHOLINE ORGANIC is a constituent of phospho-lipids, i.e. it is essential in the building and maintenance of cell structure, as well as ensuring normal maturation of the cartilage matrix of bone, including the prevention of perosis.

- In fat metabolism in the liver, choline helps for utilization and outward transport of fat, it helps to down regulates the cholesterol and triglyceride production, so preventing abnormal accumulation of fat within hepatocytes, so-called ‘fatty liver.

- Choline as a precursor for acetyl choline synthesis, the transmission agent for impulses along the sympathetic nervous system.

- Choline has a further non-essential metabolic role, as a source of labile methyl groups.

BENEFITS OF BIOTIN FROM ACT BIO-CHOLINE ORGANIC:

- It is known as Vitamin-H. it is used in cell growth, the production of fatty acids, and metabolism of fats & proteins. It plays a role in the Kreb’s cycle, which is the process in which energy is released from food.

- Biotin is also indicated for healthy skin, healthy sweat glands, nerve tissue, and bone narrow, and assisting in relieving muscle pain.

- Vitamin - H not only assists in various metabolic chemical conversions, but also helps with the transfer of carbon dioxide

ADDITIONAL BENEFITS:

- Improves skeletal & muscular growth
- Improves FCR & Anabolic effect
- Optimum production & Cell growth
- Enhanced Convalescence
- Healthy Digestion
ADVANTAGES:-

- Provides 100% Choline & Biotin to the animal/bird for optimum growth. Controls fat metabolism, & down regulates cholesterol & triglyceride production, hence prevents fatty liver syndrome.
- Keeps the Liver in its vibrant state of performance, hence there is optimum bile secretion and prevention from aflatoxicosis.
- Choline-Forte is helpful in optimum cell synthesis, hence it provides basic building blocks for newer cells.
- Prevents perosis in Poultry, so the feet remain in their healthy state. Optimizes hatchability.

FEEDING RATIO:-

- 500 gms / M. Ton can replace 1 Kg of synthetic Choline chloride and 150 mg of biotin

PRESENTATION:-

- 1 Kg Pack & 20 Kg Pack

Shelf Life:-

- 3 years
