

ACTIVER PLUS INJ

TECHNICAL DATA SHEET

Description:

Ivermectin belongs to the group of avermectin^{ins} and acts against roundworms and parasites. Clorsulon is a sulphonamide which acts primarily against adult and immature liver flukes.

Composition:

Contains per ml:

Ivermectin..... 10 mg.

Clorsulon.....100mg

Solvents ad..... 1 ml.

Indications:

Treatment of gastrointestinal, lice, lungworm, Liver fluke infections, oestriasis and scabies in cattle.

Contra-Indications:

Administration to lactating animals and pregnant heifers within 60 days of calving.

This product is not for intravenous or intramuscular use.

Side Effects:

When ivermectin comes in contact with soil, it readily and tightly binds to the soil and becomes inactive over time. Free ivermectin may adversely affect fish and some water born organisms on which they feed.

Dosage:

For subcutaneous administration.

General: 1.0 ml. per 50 kg body weight.

Withdrawal times

For meat: 35 days.
